

Montage Installation Guide 1.0.0

Montage Installation Guide

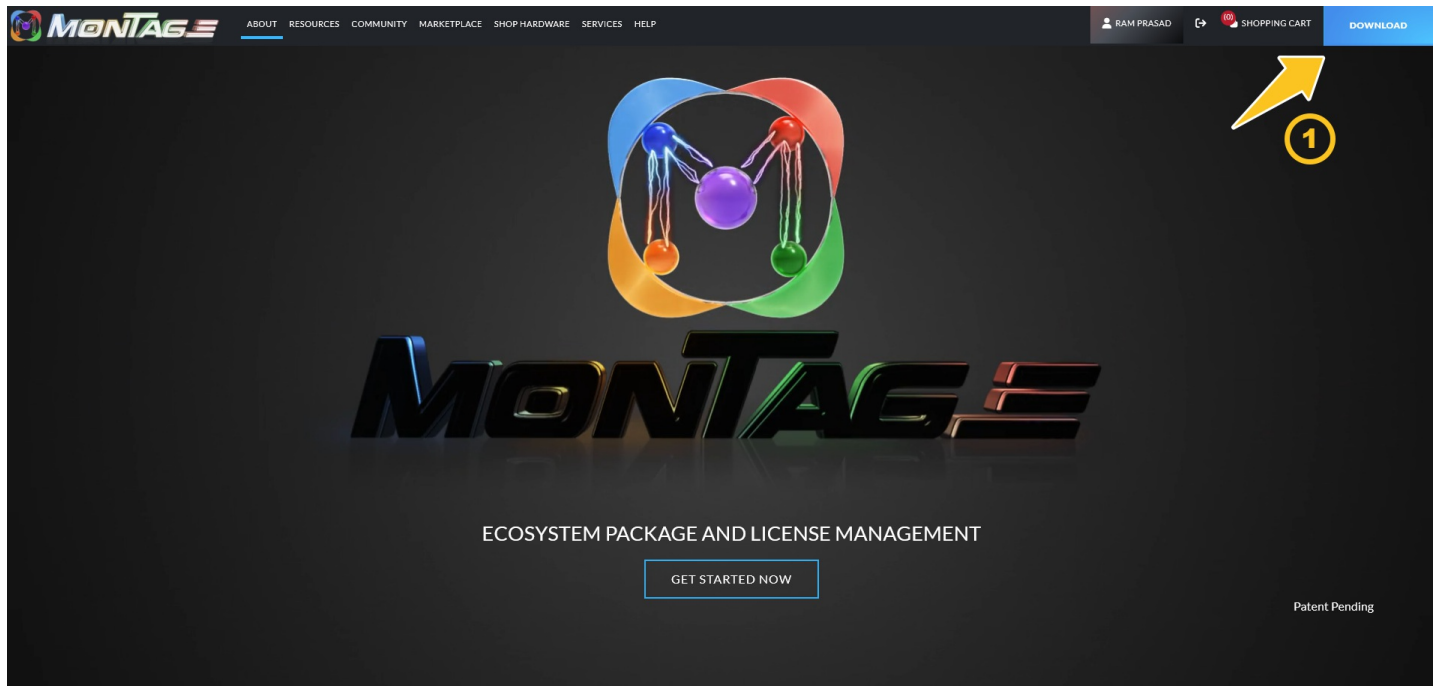

Download The Launcher

The Montage Launcher is a Windows desktop application compatible with Windows 10 and 11.

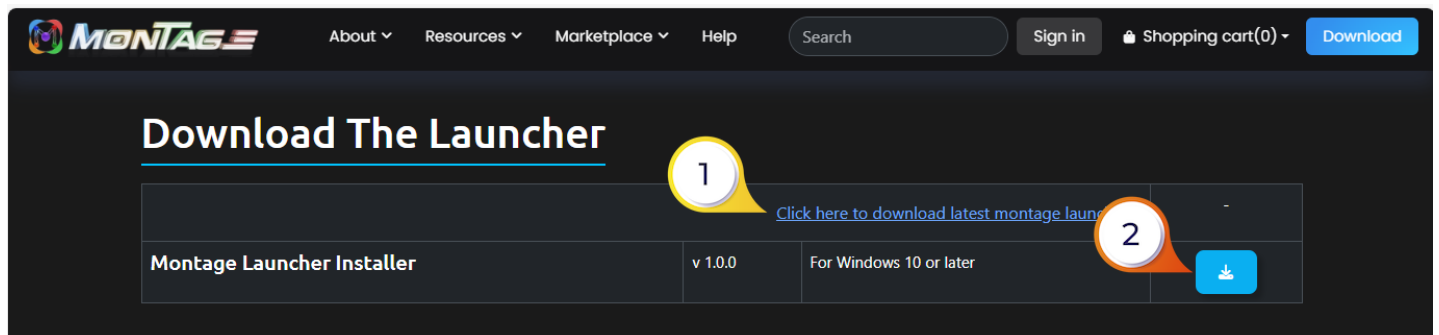

Use the link below to download the latest version of the Montage Launcher:

<https://montage-software.com/downloads/latest-montage-launcher-installer>

Alternatively, you can use the "Download" link at the top right corner of the website:

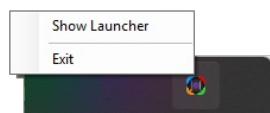

Click on "Click here to download latest Montage Launcher" (1) to download the latest version of the Montage Launcher, or click the download button next to the version you wish to download (2).

Check the "I am not a robot" reCAPTCHA, and click Continue to download the Montage Launcher installer, then run the installer.

The Launcher is a desktop application that runs in the foreground or background to handle manual requests or requests issued by Montage ecosystem clients, respectively. When you start the Launcher, it runs in the foreground. By clicking the Close button in the top right corner, the Launcher closes the foreground application and runs in the background, and is accessible in the application tray in the lower right hand corner of windows.

To bring the Launcher from the tray to the foreground, right-click the Montage Launcher icon in the tray and click "Show Launcher", as shown.

To close the Launcher, right-click on the tray icon and select 'Exit', or hold shift while clicking the Close button in the top-right corner of the Launcher application.
